

4143

(Model MOH4143 AU)

Heat Output	▪	7.6kW av
Efficiency	▪	68% av
Coverage	▪	up to 120m ²
Emissions	▪	1.4 grams/kg

A stylish, elegant and minimalist design with a focus on modern expression. The Morso 4143 is dominated by the beautiful large glass reflective door that provides a generous view of the flames.

Made from black steel this wood burning fireplace comes equipped with a convection system which ensures a steady and even flow of hot air throughout the room. It also benefits from a pre-heated secondary air, which allows for a secondary burn with more heat and less emissions, and an elevated firebox that allows room for open log storage underneath.

The history of Morso dates back to 1853 when N A Christensen started the business as an iron foundry on the Limfjord island of Mors. Since that time Morso has worked hard to combine the long stove tradition with modern innovation.

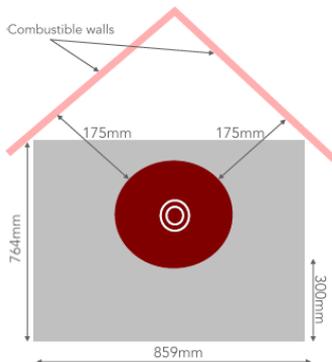

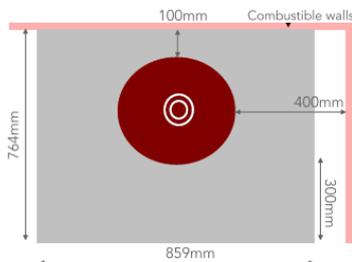

Danish design has been delighting the world for many years, and the architects and designers at Morso have made Danish design a real talking point. In 1915 Morso received the honour of being appointed to the Royal Danish Court. This prestigious appointment means that the products produced are held to the highest standards of quality.
